

## A Project Title

Think of a name for your project - this will be the title that is printed on the surface of your disc as well as on any contact sheets and insert sleeves. Common titles include the family name and date range of the photos or the name of an event.

## B Categorize and Arrange Images

You may opt to have your images grouped into separate folders based on dates or events. If you would like your scans to appear on your disc in individual folders, simply group them together in small boxes, bags, or elastic bands and label the group using tape or a sticky note. *This feature is available at no additional charge.*

If you are sending slides to be scanned, your images will be scanned in the order that they are arranged in the carousel, box, or album.
